Available some features: Game modding Debug non-fself & self real-time Wireless connection Change idps and psid Edit console Leds Ring console buzzer Get ps3 temperature Firmware compatible cex DEX 4.21 4.30 4.40 4.41 4.46 4.50 4.53 y 4.60 4.65 4.66 4.70 4.75 4.76 4.78 4.80 4.81 4.82 4.83 4.84 4.85 4.86 Installation Download ccapi package at the bottom of this side of the Insideca, you need to use the PS3 .pkg folder, Place it at the root of the usb stick. Connect the usb stick to your ps3 and install it. Also, locate the pc folder with .exe, run it, and then follow the installation instructions. Now you have installed CCAPI on your ps3 and computer. Uninstallation On PS3, you only run pkg, again on the PC, use the configuration panel and the option to uninstall the program. The Android console manager, you can get it from the Google Play store here On pc, is installed with CcApi-setup.exe. Changelog 2.80(rev7) Added 4.86 CEX support(rev6) Added 4.85 CEX support(rev5) Added 4.84 DEX support(rev5) Added 4.84 CEX support(rev4) Added 4.83 CEX support(rev3) Added 4.82 DEX support(rev2) Reduced memory useAdded ps3 TOOL support (with DEX/CEX kernel only)Added console finder into consolemanagerAdded vsh menuAdded 4.82 CEX support 2.70(rev6) Added 4.81 DEX support(rev5) Added 4.81 CEX support(rev4) Added 4.80 DEX support(rev4) Added 4.80 CEX support(rev3) Added 4.78 DEX support(rev2) Added 4.78 CEX support (rev2) Added 4.76 DEX supportAdded other platform supportOptimized network bitrate 2.60 (rev7) Added 4.76 CEX support (rev6) Added 4.75 DEX support (rev5) Added 4.75 CEX support (rev4) Added 4.70 DEX support (rev3) Added 4.70 CEX support (rev2) Added 4.66 CEX support Added 4.60/4.65 support Added Cobra support Added SetBootPsid/SetBooIdps/SetPsid 2.50 Added 4.53/4.55 support Added a console list 2.00 Reduced memory use DLL (C++ / C#) released to build programs for ccapi 1.00 Original version If you are a developer who wants to use CCAPI. You have several options: You can use the demo codes that are listed in the CCAPI developer package (download link is below). You may find an example for some languages, such as C/C++/C#. For C#, you can also use the implementation of IMCSX, a special feature that is also compatible with TMAPI. Finally the programming language is not supported, or if you want to run your implementation, you can import functions directly from CCAPI.dll yourself. The main achieve features, which are LoadLibrary/GetProcAddress from WINAPI, can be found in many C/C++/.net/Java languages, etc. CCAPI documentation (Windows) is available here: Win documentation Documentation CCAPI (Other) is available here: (Not yet) To add a new comment you need to be linked. Please add support for 4.86 hfw hen 3.0.1 can you help me that im making rtm tool that uses ccapi and im trying to use my own custom dialog for consoleolist, but I do not know how to get to this setting why will not connect and we will not allow me to download anyone?? grumpyjoker proper, but on rebug 4.84 dex you do not need to spoof your firmware, to log in to PSN you can only log on to 4.84 as dex Fw consoles do not require firmware updates to go online EDITION THAT SU WEBMAN UGRADILI I UGRADILI CCAPI, U HDDO CE CEXU SE PRODUCTS SEMI BRICKS WITH BOOT PLUGINS AND CFW REBUG WITH COBRA ACTIVATED DOES NOT WORK U CFW REBUG CEX, BESKONACNO UCITAVO ON PS3 STARTUP. Problems at the start of the game requires you to update i possible brick does not work u cfw rebug cex, infinite load on ps3 startup, problems at the start of the game that require you to update i possible bricks There's a much much much much solution easier. It's right in front of our faces: for all noobs complains about updating, just down to 4.84 rex, switch to dex, download ccapi for 4.84, spoof your firmware, spoof your cid and boom, all of a sudden you have access to your stuff. Dex's better. if you need help, anything from above go to youtube and find modded warfare has a complete tutorial on how to do everything that involves jailing pause in great detail. How about a quick update so we can use the apps we've paid for... I have 3 applications, and now out of 4.86 none of us can use them I would say it is almost illegal.
